

ZASPAL company has the following machines:

- sheet metal cutter

(thickness of cut sheet from 1,5 to 16 mm, the maximum length of cut sheet - 2500mm)

- winding rollers

(thickness of winding sheet from 0,5 to 8mm, winding diameter from 110 to 3000mm,
length - from 100 to 3000mm)

- angle bending machine

(thickness of bending sheet - 3mm, length of bending – 2000mm)

- press brake

(thickness of bending from 0,5 to 5mm, length of binding from 50 to 3000mm)

-

plasma cutter for heat-resistant and acid-resistant metal sheets

(the maximum thickness of cut sheet - 4mm)

-

semi-automatic welding machine MAGPOL 400

-

inverter welders BESTER 600 and BESTER 250

-

Machines

TIG welding machine

-

sets for cutting and gas welding
